The side effects listed below are those that occur most frequently. Other side effects may occur; please contact your doctor or oncology nurse to report any medical problems.

Dose _____

CYCLOPHOSPHAMIDE (Cytosan®)

Early Side Effects

- a. Mild nausea, vomiting, or loss of appetite may occur.

Late Side Effects

- a. A drop in blood cell counts usually occurs 7 to 10 days after treatment.
- b. Hair thinning will occur. This is temporary and your hair will grow back after the drug has been discontinued.
- c. Bladder irritation and bleeding may occur. Drink 10 - 12 (8 oz.) glasses of liquid per day and empty your bladder frequently throughout the day.
